POWER DISTRIBUTION | LIGHTING | BIM COORDINATION | AIRPORTS | HEALTHCARE

PROFESSIONAL PROFILE

Building Services Electrical Engineer with 8+ years of experience delivering coordinated electrical designs from concept through design development, tender and IFC stages. Strong capability in MV/LV distribution, electrical calculations, lighting, critical power, life-safety systems, BIM coordination and technical stakeholder engagement. Experienced across airport, healthcare, commercial, residential and leisure developments. Recognised for sound engineering judgement, constructability reviews, workflow improvement and mentoring junior engineers.

CORE CAPABILITIES

Power Systems MV/LV distribution, transformers, generators, UPS and SLDs	**Calculations** Load, cable, breaker, voltage drop, fault level and earthing	**Building Services** Lighting, emergency lighting, small power and fire alarm
Delivery Concept, DD, tender, IFC, BOQ, reports and QA/QC	**Coordination** MEP, BIM, clients, architects, vendors and PMCs	**Leadership** Planning, reviews, mentoring and lessons learned
Constructability Site information, equipment interfaces and design validation	**Sectors** Airports, healthcare, commercial, leisure and residential	**Standards** BS 7671, CIBSE, BS 5839, NFPA 72 and authority standards

PROFESSIONAL EXPERIENCE

WSP Consultants India Pvt. Ltd. — **Mar 2022 - Present**
Engineer - Electrical

- Deliver electrical building services designs for airport infrastructure, commercial, healthcare and specialist leisure projects from concept through IFC.
- Prepare MV/LV distribution concepts, load schedules, ElectricalOM calculations, transformer and UPS sizing, lighting and power layouts, SLDs, technical reports and design responses.
- Coordinate with clients, PMCs, architects, mechanical engineers, BHS specialists, BIM teams, airport stakeholders and vendors.
- Allocate work, review deliverables and mentor junior engineers and BIM technicians on standards, workflows and QA requirements.

SELECTED PROJECT EXPERIENCE

King Khalid International Airport, Terminal 1 Baggage Handling System | Riyadh

- Assessed existing MV ring loading and recommended Ring 1A/1B rather than the initially proposed Ring 2A/2B based on network loading and cable capacity.
- Developed the MV/LV distribution strategy, two 2,000 kVA transformer arrangement, switchgear philosophy, load calculations, SCADA interfaces and redundancy requirements.
- Prepared technical justifications that closed PMC comments on calculation software and local UPS redundancy; the LV design achieved Code A approval.

SELECTED PROJECT EXPERIENCE (CONTINUED)

Exit-15 Snow Park | Saudi Arabia

- Developed a Revit-SketchUp-DIALux Evo workflow for a 53,000 sq ft indoor ski environment, reducing lighting modelling effort by approximately 70%.
- Presented the approach to the client; it was accepted and recognised through an internal innovation award.

Goldman Sachs Fit-Out, KAFD | Riyadh

- Delivered small power, containment, load calculations and SLDs for Levels 15 to 17.
- Identified that the proposed 630 A breakers could not fit within the existing MDB and developed a buildable alternative using three 400 A breakers.

CSC Gatwick Airport Office | United Kingdom

- Delivered the Stage 3 electrical package covering lighting, power, fire alarm and BIM coordination.
- Introduced daylight sensing and high-efficiency LED solutions and supported a new BIM technician to maintain the programme.

Khatib & Alami Engineering Consultants Pvt. Ltd. **Jul 2018 - Mar 2022**
Graduate Engineer / Electrical Engineer

- Prepared lighting calculations and layouts, emergency lighting, small power, fire alarm, load calculations, SLDs, equipment schedules and detailed design drawings for UAE and Saudi projects.
- Progressed from supervised design tasks to ownership of calculations, coordination and complete electrical work packages.
- Applied CIBSE guidance, Abu Dhabi RSB requirements, NFPA 72 and BS 5839, as applicable.

Dibba Al Hisn Specialised Hospital | UAE

- Delivered power distribution, load calculations, SLDs and healthcare electrical design, including UPS, generator, earthing, lightning protection and critical power systems.
- Revalidated transformer sizing and electrical room requirements and coordinated two Graduate Engineers and two BIM technicians.
- Coordinated a dedicated electrical cupboard near critical medical areas to support a compliant isolation power supply arrangement.

ADDITIONAL KEY PROJECTS

Airports & Infrastructure: Pier 6 Airport Development, Gatwick, United Kingdom; Gatwick Airport North and South Terminal panel replacement, United Kingdom.

Healthcare: JPUH Ward and Lab, Cambridge, United Kingdom.

Leisure & Entertainment: Ski Dubai Modernisation, UAE; Dammam Snow Park, Saudi Arabia; Jeddah Snow Park, Saudi Arabia; Magic Planet Entertainment Centre, UAE.

Commercial & Corporate: Barclays, 1 Churchill Place, London, United Kingdom.

Education: UoC S027 Law Faculty LED Lighting Upgrade, Cambridge, United Kingdom.

TECHNICAL SKILLS

Electrical Design: MV/LV systems; distribution; load schedules; transformers; generators; UPS; cable and breaker sizing; voltage drop; fault levels; power factor correction; SLDs; containment and cable schedules.

Lighting & Life Safety: Lighting and emergency lighting calculations; DIALux modelling; lighting controls; fire alarm layouts; cause-and-effect matrices; earthing and lightning protection.

BIM & Software: Revit, AutoCAD, Navisworks, DIALux Evo, DIALux 4.13, ElectricalOM, Trimble ProDesign/Amtech, Bluebeam, Microsoft Excel and Microsoft Office.

Documentation: Design reports, specifications, equipment schedules, BOQs, RFIs, technical responses, design reviews, QA/QC and constructability assessments.

EDUCATION

BMS College of Engineering, Bengaluru — **2017**
Bachelor of Engineering, Electrical & Electronics Engineering

PVP Polytechnic, Bengaluru — **2014**
Diploma, Electrical & Electronics Engineering

PROFESSIONAL MEMBERSHIP & DEVELOPMENT

- Member of the Institution of Engineering and Technology (MIET), Membership No. 1101135307.
- Incorporated Engineer (IEng) application submitted; Professional Review Interview pending.
- Training and applied learning in Revit, BS 7671, Amtech, ElectricalOM and DIALux Evo.
- Continuing development in airport electrical infrastructure, MV ring networks, redundancy, SCADA integration and multidisciplinary delivery.

STANDARDS & REGIONAL EXPERIENCE

Strong experience applying British Standards and Middle East requirements, including CIBSE lighting guidance, BS 7671, BS 5839, NFPA 72, Abu Dhabi RSB requirements, Saudi Building Code requirements and airport authority specifications. Motivated to develop detailed knowledge of the applicable Australian or New Zealand standards, building codes and local regulations while applying transferable engineering principles and disciplined design processes.

ADDITIONAL INFORMATION

Languages: English, Kannada, Hindi and Tamil

Mobility: Currently based in Bengaluru, India and available to relocate

Passport: Valid through October 2033
